Dear Council Traveler,

Europe’s last great wilderness, the extraordinary High Arctic lands of the Svalbard archipelago summon awe and adventure like few places on earth. Journey to 80 degrees North where the human impact is slight and magnificent ice formations exert a mythical pull on the imagination.

Follow in the footsteps of Vikings, explorers and scientists as you experience the Arctic’s sublime landscapes at the best time of year, when the region is bathed in the magical light of the Midnight Sun. Join this once-in-a-lifetime, 11-day program and navigate pristine fjords, see stunning views of glimmering glaciers, land by Zodiac for ice walks and search for rare wildlife, including the King of the Arctic—the polar bear—walruses, whales, elusive Arctic foxes, reindeer and several species of seabirds.

Enjoy Five-Star accommodations aboard the Ice Class, eco-friendly L’Austral, the finest expedition ship to cruise these Arctic waters. The ship features 95% private balcony Staterooms along with spacious observation lounges and open-air decks conducive to optimum viewing and it is ideal for cruising fjords inaccessible to larger vessels. An expert Arctic Expedition Team will accompany you on board and during Zodiac excursions to explore the natural beauty of this untouched wilderness up close.

What it’s really like to be on “Top of the World”

Luminous glaciers, snow-covered mountainous landscapes, pristine fjords, massive sheets of ice, uniquely shaped icebergs and Arctic wildlife— these wondrous sights will unfold around you on this once-in-a-lifetime expedition into the untouched Arctic’s remote Svalbard archipelago. Be on the lookout for bearded seals and massive walruses resting on the ice and numerous species of whales; evanescent Arctic foxes; graceful Svalbard reindeer grazing on the Arctic’s tundra; and Arctic terns and fulmar gliding to and from cliffs. Look for the King of the Arctic—the iconic polar bear—in its natural habitat, hunting seals and traveling over sea ice. The ethereal glow of the Midnight Sun will enhance the true beauty of this extraordinary archipelago as you follow in the footsteps of polar pioneers before you in their quest to reach the “Top of the World.”

Longyearbyen, Svalbard, Norway

Your Arctic Expedition launches in the small mining town of Longyearbyen, the Norwegian Svalbard archipelago’s capital, at 78 degrees North latitude. Approximately 650 miles from the North Pole, this glacial outpost—the northernmost capital territory in the world—is framed by a breathtaking backdrop of shimmering glaciers carved into deep fjords where whale sightings are common. Enjoy a glimpse of daily life in the Arctic at the Longyearbyen Culture House before embarking L’Austral.

Hornsund/Samarin Glacier

An expert naturalist-led excursion navigates slow-drifting ice by Zodiac in the pristine bay of Burgerbukta to reach the majestic Samarin Glacier. A walk along the glacier reveals magical icy realms. Look for bearded seals relaxing on floating icebergs and a variety of seabirds, including black-legged kittiwakes, little auks, king eiders and Brünnich’s guillemots that transport nutrients to cliff tops.

Native to the Arctic tundra biome, Arctic foxes use their acute hearing to locate prey precisely.

Watch for “Arctic Giants,” enormous walruses weighing up to 1.5 tons.

Sør-Spitsbergen, Norway’s largest national park. Scattered historic trappers’ huts and redolent relics of a former coal mining settlement offer a glimpse into the region’s industrialist history. Expert naturalists accompany you through Calypsohaven’s intriguing ecosystem, where nimble Arctic foxes live.

Continue to Camp Millar, a former gold mining base where verdant land provides a favored grazing spot for the Svalbard reindeer. Look for curious reindeer and the resident colony of little auks, known for their superb diving skills.

**Cruising the Arctic Ice Pack**

Approach the Arctic Ice Pack at the approximate latitude of 80 degrees North. Survey expansive sea ice for the King of the Arctic—the vulnerable polar bear. The edges of pack ice, where currents and wind interact, are crucial for this apex
predator’s hunting as they search for seals within a melting and refreezing matrix of ice patches.

Keep a keen eye out for these solitary, well-adapted creatures, which are known to travel hundreds of miles from land on floating ice. Scan the cobalt-blue waters for endangered bowhead whales—among the longest surviving species in the world with a life span of up to 200 years—and social beluga whales.

**Woodfjorden/Monaco Glacier**
One of Svalbard’s longest fjords, **Woodfjorden** carves its way 40 miles inland, linking the Liefe Fjord with the Arctic Ocean. Woodfjorden showcases the Arctic’s contrasts—icy, glacier-fronted shores are juxtaposed against a ridge of deep-red Devonian sandstone. The mountains’ high iron oxide content has fascinated geologists, suggesting that Svalbard might have once been located near the equator. This biologically rich biome supports ringed, bearded and harp seals, and walruses can be seen on the beaches. Cruise alongside the blue-striped walls of **Monaco Glacier**, a startlingly beautiful vision. Listen for the sound of tidewater glaciers cracking as they calve into the ocean.

**Raudfjorden**
Your expert naturalist guides lead an exploration of protected **Raudfjorden** amidst Svalbard poppies. Look for rare seabirds, such as pink-footed geese, black-legged kittiwakes and glaucous gulls.

Enjoy a Zodiac excursion to the formerly bustling, 17th-century Dutch whaling station of **Smeerenburg**, today a prized resting shore for walruses.

**Ny-Ålesund**
Discover the hub of scientific exploration, **Ny-Ålesund**, where 16 international research stations function as both lab and living quarters for scientists affiliated with their country’s polar research institute. A former coal mining facility founded in 1916, this remote outpost is a fluid boundary between civilization and nature and was the launching pad for legendary Arctic explorer Roald Amundsen.

An excursion by Zodiac through the inlet of **Kongsfjorden** takes you to the tidewater **Kongsbreen** (King’s Glacier), a nesting ground for barnacle geese, common and king eiders, long-tailed ducks, purple sandpipers, Atlantic puffins and snow buntings.

**Expert Expedition Team**
An Arctic Expedition Team of seasoned naturalists who have studied, researched and traveled extensively in the Arctic accompany you throughout your voyage. The team’s collaborative efforts, experience, specialized knowledge in the Arctic’s ecosystems and enthusiasm for sharing their expertise adds extraordinary depth and insight to your Arctic Expedition under the Midnight Sun.
